- **Data Analytics & Reporting:** Advanced Excel (Pivot Tables, Power Query, Financial Modeling), Tableau Dashboard Development, Power BI Reporting & Visualization, SQL Database Queries, Data Interpretation & Analysis, Complex Data Modeling, Performance Metrics & KPI Tracking
- **Project & Knowledge Leadership:** Multiple Concurrent Project Coordination, Guidance & Direction to Internal Teams, Knowledge Transfer & Best Practices Documentation, Methodology & Tools Development, Team Lead & Individual Contributor, Stakeholder Communication & Reporting
- **Healthcare Domain:** PBM Operations, Specialty Pharmacy, Prior Authorization, Claims Adjudication, Revenue Cycle Management, Medicare/Medicaid, Payer Operations, Healthcare Data Analysis, HIPAA Compliance

PROFESSIONAL EXPERIENCE

Senior Business Analyst Bristol Myers Squibb — Birmingham, AL | May 2024 – Present

- Designed and implemented financial models and reporting solutions related to PBM pricing, margin optimization, and revenue growth; interpreted and analyzed complex healthcare data to drive business results across specialty pharmacy operations.
- Developed advanced Excel models and Tableau dashboards tracking first-pass approval rates by payer, improving approval performance from 62% to 89%; created financial and operational metrics supporting revenue maximization initiatives.
- Coordinated multiple concurrent initiatives simultaneously, providing guidance and direction to internal stakeholders and cross-functional teams; transferred analytical best practices, methodology, and tools to internal partners.
- Conducted cost-avoidance analysis demonstrating \$4,200 per-patient savings; findings informed 3 major payer contract renewals and supported strategic decision-making at leadership level.
- Analyzed workflow bottlenecks and PBM operational data across 12 specialty pharmacy partners; implemented process improvements that reduced patient onboarding time by 57% (14→6 days).

Business Analyst Mphasis — Hyderabad, India | January 2020 – July 2022

- Conducted data interpretation and analysis for Medicare and Medicaid plans; designed financial and operational reporting models supporting PBM financial and strategic decision-making.
- Developed Power BI and advanced Excel reporting solutions tracking claims edits, denial management, and revenue-cycle metrics; improved claims accuracy and reduced rejection rates from 22% to 12%.
- Coordinated multiple analytics projects concurrently for two healthcare clients; provided guidance on analytics methodology and best practices to consulting and internal teams.
- Analyzed complex PBM data sets to support financial analysis and operational insights; transferred knowledge and analytical tools to internal partners to drive ongoing business improvements.
